attn Mr Goh Leng Tse

chairman/ceo

innovalue precision (thailand)

Dear sir,

We are very sorry for the disaster,we are working around the clock for the Recovery plan with all parties concerns, repairing damaged Dikes, preparing all necessary equipments for Dewatering, order all necessary electrical panels..etc, in order that we can start work immediately after water level is stable,around Nov 10-15, Dewatering may take 10 -15 days for 10 million cu meter. We hope before end of Nov,water level will be 30-40 cm above roads in Hitech,accessable for all Companies to move in to inspect, repair damages prepare for re-opening. We shall takes only 30 days after water level stable to prepare our works. We target December 16,2011 to be able to start Services our Customers.

Please kindly be informed accordingly.

Very sincerely yours.
